Product Description

Product Description:

Material: Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing.

Appearance: Our PVC foil comes with a variety of colors, patterns and textures. It can effortlessly imitate the look of natural materials such as wood, fabric, stone and metal, while providing a cost-efficient substitute.

Versatility: Our foil can be used on various surfaces including but not limited to, doors, cabinets, furniture, and walls. It can stick on different substrates and can be applied for various purposes in the interior.

Durability: Realsun Deco PVC foil is well-thought as a reliable material because of its resistance from unraveling and strength. That is why it is widely used in high-traffic areas.

Maintenance: Our PVC foil demands minimal maintenance after installation. It is fairly easy to maintain and only requires occasional wiping down with a damp cloth.

Cost-effective: Our PVC foil's main advantage is its low-cost, in comparison to natural materials, which makes it possible to have an elegant design without costing an arm and a leg.

Modification: PVC foil manufacturers provide a vast array of styles and finishes, allowing customers to modify the foil to match project specifications and personal design preferences.

Application: Decorative PVC foil is usually used in residential and commercial objects such as kitchen and bathroom cabinets, door panels, wall coverings, furniture surfaces, retail shelves, and more.

Technical Parameters:

Thickness: 0.1mm to 0.5mm

Width: 1260mm and 1400mm

Length: 100 to 400m roll

Design: Wood grain, Solid color, Marble, Brick and other designs

Surface treatment: Matt, Super matt, embossed, high gloss, soft touch

Service: OEM, ODM, Customized

Applications:

Different methods are employed to apply the film coating for different applications.

1. Membrane Press(vacuum press): This is done with a thickness of 0.20-0.50mm, width of 1260mm and 1400mm and length of 100-300m/roll. It is typically used for covering MDF, particleboard, wooden board, fiberboard, etc, and used for doors, kitchen cabinet, wardrobe, furniture, etc. It is also used for cover embossed boards and covering five surfaces at same time.

2. Wrapping Profiles: This has got thickness of 0.12-0.18mm, width of 40mm-1260mm and length of 300-800m/roll. It is used for covering all kinds of profiles which includes wood profile, aluminum profile, PVC profile, etc. These are typically used for door frames, window sills, base channels, PVC ceiling and so on.

3. Cold Laminating: It has a thickness of 0.12-0.20mm, width of 1240-1260mm and length of 300-500m/roll. It is used for covering all kinds of flat panels like wood panel, steel panel, aluminum panel, PVC panel, etc. for doors and furniture.

4. Hot Laminating: This method has thickness of 0.16-0.30mm, width of 1260mm and length of 200-300m/roll. It is used for covering PVC panel, steel panel and aluminum panel for doors, skirting and so on.

5. Self-adhesive: This has a thickness of 0.10-0.20mm, width of 600mm/1220mm and length of 5-50m/roll. It can be applied to any smooth surface for furniture and indoor decorations.
