Product Description

Waterproof Wood Grain PVC Film with Deep Embossed Texture

Product Description:

Our **PVC Foil** is mainly made from *Polyvinyl Chloride (PVC)*, a synthetic plastic material which is renowned for its durability, flexibility, and ease of processing. It is available in a wide range of colors, patterns, and textures, mimicking the look of natural materials such as wood, stone, fabric, or metal while providing a cost-effective alternative to these materials yet retaining a high-quality aesthetic.

Our pvc foil can be applied to various surfaces such as doors, cabinets, furniture, walls, and more. It adheres to different surfaces easily and can be used in different areas, meanwhile, impressively known for its durability and strength, so it is frequently used in high-traffic locations.

It requires little maintenance once placed, simply needing to be wiped down with a moist cloth once a week. The affordability of this product in comparison to natural materials make it an attractive choice for many. Furthermore, it has a large range of styles and finishes available from manufacturers, enabling customization to meet project specifications and personal design preferences. Decorative pvc foil is often used in residence or commercial buildings for bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays and more.

Technical Parameters:

The remarkable product has a great range of thickness levels, ranging from 0.1mm to 0.5mm. It is available in two widths - 1260mm and 1400mm - and can be purchased in rolls ranging in length from 100m to 400m. There is an extensive selection of wood grain designs to choose from, with categories such as matt, super matt, embossed, high gloss, and soft touch. OEM, ODM, and customized services are also offered for special requests.

Applications:

PVC Foil Overview

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing. It comes with a variety of colors, patterns and textures and can effortlessly imitate the look of natural materials such as wood, fabric, stone and metal, while providing a cost-efficient substitute.

Our foil can be used on various surfaces including but not limited to, doors, cabinets, furniture, and walls. It can stick on different substrates and can be applied for various purposes in the interior. PVC foil is well-thought as a reliable material because of its resistance from unraveling and strength, making it suitable for high-traffic areas.

Our PVC foil demands minimal maintenance after installation. It is fairly easy to maintain and only requires occasional wiping down with a damp cloth. Our foil's main advantage is its low-cost, in comparison to natural materials, which makes possible to have an elegant design without costing an arm and a leg.

PVC foil manufacturers provide a vast array of styles and finishes, allowing customers to modify the foil to match project specifications and personal design preferences. It is usually used in residential and commercial objects such as kitchen and bathroom cabinets, door panels, wall coverings, furniture surfaces, retail shelves, and more.

Technical Parameters

Thickness: 0.1mm to 0.5mm

Width: 1260mm and 1400mm

Length: 100 to 400m roll

Design: Wood grain, Solid color, Marble, Brick and other designs

Surface treatment: Matt, Super matt, embossed, high gloss, soft touch
