oem wood grain pvc film**

Product Description

Door Wood Grain PVC Film - More Than Hundreds Wood Grain Design For Choose

Product Description:

Our **Polyvinyl Chloride (PVC) foil** is made from PVC, a synthetic plastic material which is well-known for its durability, flexibility, and ease of processing. It has a wide range of colours, patterns, and textures, which can imitate the look of natural materials such as wood, stone, fabric, or metal, and hence offering a cost-effective substitute for these materials.

Moreover, the foil can be applied to different surfaces such as doors, cabinets, furniture, walls, etc, and it adheres well to different substrates. It is also very **durable**, often used in high-traffic locations which require less maintenance, like wiping down weekly with a moist cloth. The advantages of Decorative PVC foil over natural materials include its affordability, a wide range of styles and finishes offered, and its common use in residential and commercial settings, like kitchen cabinets, interior doors, wall paneling, furniture surfaces etc.

Technical Parameters:

Specification

The thickness of the product ranges from 0.1mm to 0.5mm, as well as the width, available in 1260mm and 1400mm respectively. The product is delivered in rolls of 100 to 400m.

We offer hundreds of designs for customers to choose from, and varied surface treatment options including matt, super matt, embossed, high gloss and soft touch.

OEM, ODM and customized services are all provided.

Applications:

Our PVC foil is comprised of Polyvinyl Chloride (PVC), an artificial plastic material renowned for its durability, flexibility and ease in processing.

Our PVC foil comes with a variety of colors, patterns and textures. It can effortlessly imitate the look of natural materials such as wood, fabric, stone and metal, while providing a cost-efficient substitute.

Our foil can be used on various surfaces including but not limited to, doors, cabinets, furniture, and walls. It can stick on different substrates and can be applied for various purposes in the interior.

Realsun Deco PVC foil is well-thought as a reliable material because of its resistance from unraveling and strength. That is why it is widely used in high-traffic areas.

Our PVC foil demands minimal maintenance after installation. It is fairly easy to maintain and only requires occasional wiping down with a damp cloth.

Our PVC foil's main advantage is its low-cost, in comparison to natural materials, which makes it possible to have an elegant design without costing an arm and a leg.

PVC foil manufacturers provide a vast array of styles and finishes, allowing customers to modify the foil to match project specifications and personal design preferences.

Decorative PVC foil is usually used in residential and commercial objects such as kitchen and bathroom cabinets, door panels, wall coverings, furniture surfaces, retail shelves, and more.

The technical parameters are as follows: thickness from 0.1mm to 0.5mm; width of 1260mm and 1400mm; length of 100 to 400m roll and design which includes wood grain, solid color, marble, brick and other designs; surface treatment include matt, super matt, embossed, high gloss and soft touch; and OEM, ODM and customised service is available.

Different methods are employed to apply the film coating for different applications including membrane press, wrapping profiles, cold and hot laminating and self-adhesive.

Customization:
