- Width: 1260mm, 1400mm
- Length: 100-400m/roll
- Highlight: **Mdf Membrane PVC Interior Film,**
Wood Textured PVC Interior Film,
Mdf Membrane decorative pvc foil

Product Description

Texture Semi-Rigid/Rigid PVC Vacuum Film For Mdf Membrane Furniture Films

Product Description:

Our **PVC foil** has many unique qualities that make it a great choice among interior design materials.

For starters, the main ingredient of PVC foil is *Polyvinyl Chloride (PVC)*; a synthetic plastic with outstanding strength, flexibility and processing simplicity. Furthermore, we have various colors, patterns, and textures available for our PVC Foil so it can imitate the appearance of real materials like wood, stone, cloth or metal. Yet, compared to such materials, our product is more affordable while blending in premium aesthetics.

Its adaptability makes it suitable for any surface, such as walls, doors, cabinets and furniture, while its durability make it a common choice for high-traffic areas. Moreover, it requires very little effort to maintain, just needing a weekly wipe with wet cloth. What's more, it even has a cost-efficient advantage over natural materials.

It is also possible to modify the product to match individual project requirements and preferences thanks to its wide variety of styles and finishes. Finally, our PVC Foil can be used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other purposes in both residential and commercial settings.

Technical Parameters:

Specifications

Our company offers superior quality products in various thicknesses from 0.1mm up to 0.5mm. We provide products in two widths: 1260mm and 1400mm, and lengths of 100m to 400m per roll. Customers can make selections from a extensive variety of designs, including wood grain, solid color, marble, and brick. Our products are also available in several surface treatments from matt, super matt, embossed, high gloss, and soft touch. All of our products can be customized for our valued customers whether it is OEM or ODM.

Applications:

Different Process for different application:

1. Membrane Press (Vacuum Press)

Membrane Press is available in a range of thicknesses, from 0.20mm to 0.50mm, and in widths of 1260mm and 1400mm. It is available in rolls of up to 300m in length. It's most commonly used in the construction of doors, kitchen cabinet, wardrobe, furniture and the like. It has one unique advantage because it can cover five surfaces at the same time.

2. Wrapping Profiles

Wrapping Profiles is suitable for wrapping around a range of materials, including wood, aluminum and PVC, as well as for using as door frames and window sills. It is 0.12-0.18mm thick, with a width of 40-1260mm and a length of up to 800m rolls.

3. Cold Laminating

Cold Laminating is used in the pre-lamination to provide decoration finishes to flat surfaces, such as wood panel, steel panel, aluminum panel, PVC panel, etc. It is 0.12-0.20mm thick with a width of 1240-1260mm and a length of 300-500m.

4. Hot Laminating

Hot Laminating has a range of thicknesses from 0.16mm to 0.30mm, and a width of 1260mm, and is normally provided on rolls up to 300m in length. Hot Laminating is mostly used for laminating metal boards, such as PVC, steel and aluminum, for doors, skirting, etc.

5. Self-adhesive

Self-adhesive is used to provide decoration to any smooth surface for furniture and indoor decorations. It is 0.10-0.20mm thick, with widths of 600mm and 1220mm, and length of up to 50m.
