                 1260mm pvc furniture foil

1260mm Width Indoor Decoration Color PVC Furniture Laminating Film Roll

Product Description:

Our **PVC foil** is made with **Polyvinyl Chloride (PVC)**, a synthetic plastic known for its excellent strength, flexibility, and affordability. It has the added benefit of mimicking the appearance of wood, stone, cloth, or metal while being cheaper and still offering a premium look. This reliable material is suitable for a wide range of surfaces, such as walls, doors, cabinets, and furniture. It is strong and resistant to deterioration, making it ideal for use in busy areas. On top of that, it's easy to maintain - all it needs is a weekly cleaning with a wet cloth. Moreover, our PVC foil can be an economical choice for many projects - when compared to natural materials, it allows for the same sophisticated aesthetics while costing much less. A variety of styles and finishes are available from manufacturers, making it possible to customize the foil to fit individual design requirements.
Our PVC foil can be used for a variety of purposes, including wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and other applications both in homes and businesses.

Technical Parameters:

Our products have the following features:
Thickness: available in a range of 0.1mm to 0.5mm
Width: specifically 1260mm and 1400mm options
Length: customizable from 100m to 400m per roll
Design: customers can choose from wood grain, solid color, marble, brick, and various other design options.
Surface treatment: matte, super matte, embossed, high-gloss and soft touch are the available options.
Service: we provide OEM and ODM services.

Applications:

The technology required to manufacture products is different depending on the applications for which they will be used. Membrane press (vacuum press) is used to press on MDF, particleboard, wooden board, fiberboard, etc., for doors, kitchen cabinet, wardrobe, and furniture; it can cover the embossed board and five surfaces at the same time and has thickness between 0.20-0.50mm, widths of 1260mm and 1400mm, and length of 100-300m per roll.
Wrapping profiles have a thickness of 0.12-0.18mm, widths of 40-1260mm and length of 300-800m per roll. They are used to cover all kinds of profiles, including wood profiles, aluminum profiles, and PVC profiles, for door frames, window sills, base channels, and PVC ceilings.
Cold laminating is for flat panels such as wood panels, steel panels, aluminium panels, and PVC panels, and is for doors and furniture. It has thickness of 0.12-0.20mm, width of 1240-1260mm and lengths of 300-500m per roll. Hot laminating is for steel, aluminium and PVC panels for doors and skirting. It has thickness of 0.16-0.30mm, width of 1260mm and length of 200-300m per roll.
Self-adhesive materials can be placed on any smooth surface for furniture and indoor decorations. They are 0.10-0.20mm in thickness, 600mm or 1220mm in width, and 5 to 50m per roll.
