- MOQ: 2000-3000m/model
- Highlight: **Hot Press PVC decorative film,**
PVC decorative film 0.14mm,
pvc decorative foil 0.14mm

Product Description

Product Description:

Our Realsun Deco PVC Foil is an excellent synthetic plastic option, made mainly with Polyvinyl Chloride (PVC). It offers incredible strength, flexibility, and it is relatively easy to process during production. It is also a practical alternative to costlier real materials like wood, stone, cloth, and metal because it can imitate their appearance but be more affordable and still maintain a premium look. Additionally, applying the foil requires minimal effort and provides excellent durability and longevity for a variety of high-traffic areas. It is suitable for a multitude of surfaces and can be used in any interior space, often for wall paneling, furniture, retail displays, and interior doors. It can easily be modified to fit specific project requirements and personal design preferences with a wide array of styles and finishes. Furthermore, the foil requires minimal maintenance; it just needs to be wiped with a damp cloth once a week. Given all its benefits, Realsun Deco PVC Foil has become a very popular and economical choice allowing people to create sophisticated aesthetics without having to break the bank. Thus, it is highly regarded in both home and commercial settings.

Technical Parameters:

Introduction: We offer different types of PVC decorative film with thickness from 0.1 to 0.5mm, width of 1260mm and 1400mm as well as a range of length from 100 to 400 m/roll.

We provide various design styles including wood grain, solid color, marble, brick and other designs.

The surface treatment of these PVC sheeting is available in many forms such as matt, super matt, embossed, high gloss, soft touch.

Besides this, we also offer OEM, ODM and customized logo services to meet different customer requirements.

Applications:

The PVC film is packed in roll with wrapping foam sheet, kraft paper and plastic sheet. We can offer pallet packing for shipping by sea or air.

Different Process for Different Application

1. Membrane Press (vacuum press): The thickness ranges from 0.20mm to 0.50mm. The width can be either 1260mm or 1400mm. Length is between 100 to 300m/roll. This process is mainly applied in MDF, particleboard, wooden board, fiberboard, etc, for doors, kitchen cabinet, wardrobe, furniture, etc. It also covers on embossed board, thereby covering five surfaces at the same time.

2. Wrapping Profiles: The thickness ranges from 0.12mm to 0.18mm. The width is between 40mm and 1260mm. Length is 300 to 800m/roll. This process usually covers on all kinds of profiles such as wood profile, aluminum profile, PVC profile, etc. They are mainly applied on door frame, window sill, base channel, PVC ceiling and so on.

3. Cold Laminating: This process is applied with the thickness ranging from 0.12mm to 0.20mm. The width is from 1240mm to 1260mm. Length is 300 to 500m/roll. All kinds of flat panels such as wood panel, steel panel, aluminum panel, PVC panel are applicable by this process. It is mainly applied in doors and furniture.

4. Hot Laminating: It covers with the thickness from 0.16mm to 0.30mm. The width is 1260mm. Length is from 200 to 300m/roll. The applicable panels include PVC panel, steel panel, aluminum panel. Such surfaces are mainly used in doors, skirting and the alike.

5. Self-adhesive: This process has the thickness from 0.10mm to 0.20mm with the width of 600mm or 1220mm. Length is 5 to 50m/roll. It can be put on any smooth surface for furniture and indoor decorations.
