- Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch
- Packing: Pack In Roll
- Highlight: **1260mm pvc decor film,
wardrobe pvc decor film,
wardrobe Decoration wood grain foil**

Product Description

Product Description:

Our **PVC foil** is primarily made from *Polyvinyl Chloride (PVC)*, a synthetic plastic material known for its durability, flexibility, and ease of processing. This product is available in a wide range of colors, patterns, and textures, mimicking the look of natural materials like wood, stone, fabric, or metal. It lends a high quality aesthetic, yet is cost-effective when compared to natural materials. PVC foil is regularly used in high-traffic locations because of its resilience to deterioration and strength. It can be applied to a variety of surfaces and is suitable for indoor use. Maintenance is also simple as it only requires the user to wipe it down with a moist cloth on a weekly basis. Another perk of the PVC foil is that it is relatively affordable compared to natural materials. In addition, manufacturers have a variety of styles and finishes available that are able to meet project specifications and design preferences. It is common to find PVC foil in residential and commercial settings, used for applications such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Overview

We offer PVC decorative films with a range of thickness from 0.1mm to 0.5mm, widths available at 1260mm and 1400mm, and length can be 100-400m/roll. Our products are provided in various design patterns such as wood grain, solid color, marble, brick and more, with surface treatments including matt, super matt, embossed, high gloss and soft touch. Customized OEM and ODM services are also available.

Applications:

Different Process for different application

1.Membrane Press (vacuum press)

This process is capable of producing thicknesses between 0.20-0.50mm with widths of 1260mm or 1400mm, and lengths of up to 300m/roll. The material can be used for covering MDF, particleboard, wooden board, fiberboard, etc., and is suitable for doors, kitchen cabinets, wardrobes and other furniture. It can also cover embossed board and five surfaces at the same time.

2.Wrapping Profiles

This process produces thicknesses between 0.12-0.18mm, widths of 40-1260mm and lengths of up to 800m/roll. It is suitable for covering all kinds of profiles, including wood profiles, aluminium profiles, PVC profiles, etc., and can be used for door frames, window sills, base channels, and PVC ceilings.

3.Cold Laminating

This process produces thicknesses between 0.12-0.20mm, widths of 1240-1260mm and lengths of 300-500m/roll. It is suitable for covering all kinds of flat panels, such as wood panels, steel panels, aluminium panels, PVC panels, etc., and can be used for doors and furniture.

4.Hot Laminating

This process produces thicknesses between 0.16-0.30mm with a width of 1260mm and length of up to 300m/roll. It can be used for covering PVC panels, steel panels, aluminium panels and is suitable for doors, skirting and more.

5.Self-adhesive

With thicknesses between 0.10-0.20mm and a width of 600mm/1220mm, this process can product rolls of up to 50m in length. It can be used on any smooth surface for furniture and indoor decorations.
