Product Description

Product Description:

Our Pvc foil is primarily made from Polyvinyl Chloride (PVC), which is a synthetic plastic material known for its durability, flexibility, and ease of processing.

Our pvc foil is available in a wide range of colors, patterns, and textures. It can emulate the look of natural materials such as wood, stone, fabric, or metal, providing a more cost-effective alternative while maintaining the same visual quality.

This type of foil can be applied to many surfaces, including doors, cabinets, furniture, walls, and more. It adheres well to different substrates and can be used in different area in interior.

Realsun Deco PVC foil is renowned for its resilience to deterioration and strength. It is therefore, popularly used in high-traffic locations. It can be easily maintained with little upkeep, just by wiping it down with a moist cloth once per week.

The affordability of pvc decorative foil in comparison to natural materials is one of its main benefits. It thus, makes it possible to create upscale designs without incurring the same amount of expenses.

Manufacturers provide a wide range of styles and finishes, making it easy to modify the foil to correspond to specific project requirements and design preferences.

Decorative pvc foil is commonly used in residential and commercial applications, such as kitchen and bathroom cabinets, interior doors, wall paneling, furniture surfaces, retail displays, and more.

Technical Parameters:

Our products have various ranges in the thickness and width. They come with thickness ranging from 0.1mm to 0.5mm and widths 1260mm and 1400mm. We offer our products with a length of up to 400m/roll, providing you with different lengths according to your needs. With regard to the design, wood grain, solid color, marble, brick and etc are the choices you have. Each has its unique style, and adds personality to your style. As for the surface treatment, we provide matt, super matt, embossed, high gloss and soft touch, so that you can have different options to choose according to your demands. Furthermore, we also provide OEM, ODM and free samples, so that it is much easier for our customers to obtain what they need.

Applications:

Process 1: Membrane Press (vacuum press). It has a thickness from 0.20-0.50mm, width of 1260mm-1400mm, and length from 100-300m/roll. This process is used to cover MDF, particleboard, wooden board, fiberboard, etc. for doors, kitchen cabinets, wardrobes, furniture, and other surfaces such as embossed board. It is capable of covering all five surfaces at the same time.

Process 2: Wrapping Profiles. This process has a thickness range from 0.12-0.18mm, width of 40-1260mm, and length from 300-800m/roll. It is used to cover all kinds of profiles including wood profile, aluminum profile, PVC profile, etc. for door frames, window sills, base channels, PVC ceilings, etc.

Process 3: Cold Laminating. It has a thickness from 0.12-0.20mm, width of 1240-1260mm, and length of 300-500m/roll. This process is used to cover all kinds of flat panels such as wood panel, steel panel, aluminum panel, PVC panel, etc. for doors, furniture and other surfaces.

Process 4: Hot Laminating. It has a thickness range from 0.16-0.30mm, width of 1260mm and length from 200-300m/roll. This process is used to cover the PVC panel, steel panel, aluminum panel for doors, skirting, etc.

Process 5: Self-Adhesive. This process has a thickness range from 0.10-0.20mm, a width of 600mm/1220mm, and length from 5-50m/roll. It can be put on any smooth surface for furniture, indoor decorations, and other surfaces.
