Product Description

Product Description:

Our Realsun Deco PVC foil is a great option for home decor projects. It is made of a synthetic plastic known as Polyvinyl Chloride (PVC), which is valued for its strength, flexibility and ease of processing.

Our foil can easily imitate the look of real materials such as stone, wood, metal and cloth. And though it offers a premium appearance, it is much more affordable. Furthermore, it's suitable for a wide variety of surfaces, from walls and doors to cabinets and furniture.

This foil is also durable and highly resistant to deterioration, making it a great choice for high-traffic areas. Taking care of it is also easy, as it only needs to be wiped down with a wet cloth once a week.

Moreover, it is much less expensive than natural materials, so you can create sophisticated aesthetics without spending too much. Manufacturers offer a variety of styles and finishes, allowing you to modify the foil to match project requirements and personal design preferences.

This PVC foil can be used for a variety of projects, such as wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and much more. It is especially useful for both home and commercial settings.

Features:

Product Name: PVC Furniture Film

MOQ: 3000m/model

Width: 1260mm, 1400mm

Length: 100-400m/roll
