Basic Information

- Place of Origin: Foshan, China
- Brand Name: Realsun Deco
- Minimum Order Quantity: 3000m/model
- Price: Negotiable
- Packaging Details: Pack in roll
- Delivery Time: 15-20 days
- Payment Terms: T/T 30% down payment, 70% balance before shipment
- Supply Ability: 500000m/month

Product Specification

- Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, Etc.
- Packing: Pack In Roll
- Feature: Non-toxic/ Anti-Flame/ Moisture-proof
- Service: OEM, ODM
- MOQ: 3000m/model
- Thickness: 0.10mm-0.50mm
- Width: 1260mm, 1400mm
- Usage: Lamination, Wrapping Machine, Vacuum Membrane Press
- Highlight: **PVC Film Rolls Flame Proof, 0.50mm Thickness PVC Film Rolls, Moisture Resistant PVC Film Rolls**

Decorative PVC Film Rolls Flame Proof Moisture Resistant 0.10mm-0.50mm Thickness

Product Description:

Decorative PVC Film Product Overview

Material Composition

Polyvinyl Chloride (PVC) stands at the core of our Decorative PVC Film, delivering an optimal balance of strength, flexibility, and ease of processing. This synthetic plastic material is the cornerstone of its superior qualities.

Visual Appeal

Our expansive selection includes a vast palette of colors, intricate patterns, and varied textures that adeptly mimic the aesthetics of natural wood, stone, fabric, and metal. These foils bring an element of luxury at a fraction of the cost of genuine materials.

Versatility in Use

The adaptability of our Decorative PVC Film is evident in its compatibility with a multitude of surfaces including walls, doors, cabinetry, and a range of furniture items. Its application versatility makes it a go-to option for diverse interior design needs.

Enduring Durability

Realsun Deco Decorative PVC Film's robust nature ensures its resistance to wear and tear. This durability is particularly appealing for areas that see significant use, promoting a lasting finish and enduring appeal.

Low Maintenance

Maintaining the pristine condition of our Decorative PVC Film post-installation is virtually effortless. Routine cleaning requires nothing more than a soft cloth and water, simplifying upkeep to a mere once-weekly task.

Cost-Effectiveness

The affordability of our decorative Decorative PVC Film makes elegant design more accessible. It provides a cost-effective alternative for achieving sophisticated interiors without the expense of natural material counterparts.

Customization Opportunities

A wide spectrum of style options and finishes allows for extensive customization, meeting diverse project specifications and individual tastes in design.

Applications and Uses

Decorative Decorative PVC Film is a versatile choice for an array of applications. Its use extends from wall paneling to furniture, and from retail displays to internal doors, including kitchen and bathroom cabinets, widely sought after in both residential and commercial domains.

Features:

Product Name: Decorative PVC Film

MOQ: 3000m/model

Service: OEM, ODM

Design: Wood Grain, Marble, Brick, Stone, and so on

Application: Furniture/ Cabinet/ Door/ Wall/ Ceiling/ Profile, etc.

Surface: Glossy/ Matt/ Embossed/ Super Matt/ Soft Touch

pvc lamination foil

soft touch pvc foil

PVC membrane for furniture

Applications:

Membrane Press/Vacuum Press

Utilized for creating a seamless finish on surfaces, the Membrane Press, or vacuum press method, applies to materials with a thickness ranging from 0.20 to 0.50mm and comes in widths of 1260mm and 1400mm. Roll lengths vary between 100 and 300 meters. Suitable for covering MDF, particleboard, wooden boards, and fiberboard, it is primarily used for doors, kitchen cabinets, wardrobes, and other furniture pieces. It can also effectively cover embossed boards, treating all five surfaces simultaneously.

Wrapping Profiles

With a material thickness ranging from 0.12 to 0.18mm and widths extending from 40 to 1260mm, this method accommodates rolls of 300 to 800 meters in length. The wrapping profile technique is perfect for covering many types of profiles, including wood, aluminum, and PVC. Applications include door frames, window sills, base channels, and PVC ceilings.

Cold Laminating

Designed for covering various flat panel types such as wood, steel, aluminum, and PVC panels, cold laminating features a material thickness of 0.12 to 0.20mm. Available in widths of roughly 1240 to 1260mm, rolls come in lengths of 300 to 500 meters. Cold laminating is an excellent choice for doors and furniture surfaces, providing a smooth and protected finish.

Hot Laminating

Providing high durability, hot laminating applies a thickness of 0.16 to 0.30mm to the material. With widths fixed at 1260mm, the rolls' lengths range from 200 to 300 meters. This method is well-suited for PVC panels, steel panels, and aluminum panels used in doors, skirting, and similar applications.

Self-adhesive Laminating

Offering the utmost versatility, self-adhesive laminates come in thicknesses from 0.10 to 0.20mm and widths either at 600mm or 1220mm. Roll lengths are considerably more flexible, ranging from 5 to 50 meters. This particular laminate can adhere to any smooth surface and is widely used for furniture and indoor decorations, allowing for a quick and easy upgrade.
